Reference for Hydrainer Pump Hire Ltd

Hydrainer Pump Hire Ltd was contracted by MVB JV to undertake the majority of pumping operations throughout the duration of the Lee Tunnel Project in March 2010.

The selection of Hydrainer Pump Hire was made much easier due to working with them on previous projects. Also, in a very competitive market they stand out with their professional attitude towards their client's needs; they have a broad understanding of our industry and provide an efficient service which in return produces a value for money service.

More importantly they have established relationships with both site and office management but always adhere to our procedures at all times.

On selecting a preferred pump supplier we rely heavily on their expertise and Hydrainer fit our criteria; they offer an extensive amount of knowledge which is given with a level of professionalism which we have now grown accustomed to.

Hydrainer include within their service a 'second to none' backup and 24/7 breakdown cover which has been tried and tested over the years; both client and contractor have learnt to envisage potential problems with invaluable feedback which in itself has prevented unnecessary stoppages and immeasurable cost savings to the project.

We would have no hesitation in recommending Hydrainer's service and we look forward to working with them in the future.

Yours Sincerely
Kevin Greene
